(54) Title: **VEHICLE-MOUNTED EQUIPMENT CARRIER**

(57) Abstract: An equipment carrier for mounting onto a rear component of a vehicle structure, such as a vehicle trunk lid or door, comprises a frame having lower engagement elements engageable with a lower area of the vehicle component, a structure connected to the frame for carrying one or more items of equipment, at least one vehicle engaging member, connected to the frame, for engaging the vehicle component at a position above said lower area, a strap member having upper engagement elements for engagement with an upper area of the vehicle component, and at least one support connected to the frame, provided with a strap engaging and tensioning mechanism, which is engaged by the strap member and can be controlled for tensioning the strap member in order to tighten the upper and lower engagement elements onto the upper and lower areas of the vehicle component.
